What is this product?

Type

Shares of a sub-fund of Fidelity UCITS II ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

SFDR Article 9 (has sustainable investment objectives) - ESG Target.

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity UCITS II ICAV may terminate the fund by way of liquidation or merger.

Objectives

Investment objective The fund aims to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

Investment policy The fund invests in a portfolio primarily made up of EUR denominated investment grade corporate debt securities of issuers globally.

The fund is aligned with the Paris Agreement's climate targets on greenhouse gas emission reduction.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment approach The fund is actively managed and references the Solactive Euro Corporate IG PAB Index (the "Benchmark") as part of its investment process. The reduction of carbon emission objective of the fund will be at least aligned with the Benchmark. The fund assesses the ESG characteristics of more than 90% of its assets. The fund uses a combination of quantitative, fundamental and sustainability research to select securities which are: (a) weighted with a view to maximising portfolio return relative to the Benchmark; (b) at least aligned with the carbon emission performance of the Benchmark; and (c) sustainable investments. For more information, see "Sustainable Investing Policy and ESG Integration" and the Sustainability Annex sections of the Prospectus.

Benchmark Solactive Euro Corporate IG PAB Index, an index that takes into account ESG characteristics. Used for: alignment of reduction of carbon emission objective of the fund. The Benchmark tracks the performance of investment grade EUR denominated corporate debt securities publicly issued

globally while at the same time aiming to align with the Paris Agreement's climate targets on greenhouse gas emission reduction. As a result of complying with these targets and the minimum technical requirements for EU Paris-aligned benchmarks, the Benchmark will be labelled as an EU Paris Aligned Benchmark. In addition, the Benchmark excludes issuers based on their involvement in activities with significant externalities (tobacco, fossil fuels, controversial weapons etc.), breaches of international norms and with a significant negative impact on certain sustainable development goals. The governance practices of issuers are assessed as part of the Benchmark construction process with the exclusion of companies with verified failure to respect established norms. Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

Distribution policy As this is a non-distributing share class, dividends are re-invested.

Base Currency EUR

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 3 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 Years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the Management Company is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between (10/2017 - 10/2022).

Moderate scenario: This type of scenario occurred for an investment between (03/2021 - 03/2026).

Favourable scenario: This type of scenario occurred for an investment between (04/2016 - 04/2021).

What happens if the Management Company is unable to pay out?

The assets and liabilities of this product are segregated from those of the Management Company. There is no cross-liability between these entities, and the product would not be liable if the Management Company or any delegated service provider were to fail or default. This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- EUR 10 000 is invested.

Example Investment 10 000 EUR		
Scenarios	If you exit after 1 Year	If you exit after 5 years (recommended holding period)
Total Costs	20 EUR	95 EUR
Annual Cost impact (*)	0.2%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.1 % before costs and -0.3 % after costs.

*Authorised participants dealing directly with the fund may pay an entry charge up to 5% and an exit charge up to 3%. Although not charged directly to investors who are not authorised participants, these charges may have an impact on brokerage fees, transaction fees and / or the "bid-ask" spread.
