## What is this product?

### Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank of Ireland as a UCITS.

### Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

### Objectives

**Investment objective** The investment objective of the Fund is to track the equity market of developed and emerging markets.

The Fund seeks to track the performance of the MSCI ACWI IMI Resilient Future Select 35/20 Capped Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

**Investment policies** The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index. The Index measures the performance of global companies that are associated with the development of products and services focused on components related to the "Resilient Future" theme which may play an important role in achieving a transition towards a more sustainable global economy by reducing the likelihood of crossing irreversible environmental tipping points such as significant climate change, groundwater depletion or biodiversity loss. The Index excludes certain companies based on their involvement in the following controversial business activities: controversial weapons, civilian firearms, tobacco, thermal coal mining, and thermal coal power. The Index also excludes companies which are identified by the index provider as being involved in controversies that have a negative ESG impact on their operations and/or products and services based on an MSCI ESG controversy score ("MSCI ESG Controversy Score"). The MSCI ESG Controversy Score reflects an assessment by the Index provider of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The environmental and social characteristics promoted by the Fund include i) reduction of non-renewable natural resource utilisation and pollution, ii) reduction of severe environmental related controversies, iii) involvement in human rights and community impact, labour rights and supply chain management, and customer-related issuers which promote product quality and customer related welfare. Although the Index is generally well diversified, because of the market it reflects it may, depending on market conditions, contain constituents issued by the same body that may represent more than 10% of the Index. In order for the Fund to track the Index accurately, the Fund will make use of the increased diversification limits available under Regulation 71 of the

UCITS Regulations. These limits permit the Fund to hold positions in individual constituents of the Index issued by the same body of up to 20% of the Fund's Net Asset Value and a position of up to 35% of the Fund's Net Asset Value in constituents of the Index issued by the same body, due to exceptional market conditions (i.e. the issuer represents an unusually large portion of this market measured by the Index).

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. These environmental and social characteristics are detailed in the SFDR Annex of the Fund's Supplement.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on [www.ssga.com](http://www.ssga.com)); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.

**Index Source:** The funds or securities referred to herein are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The Prospectus contains a more detailed description of the limited relationship MSCI has with State Street Investment Management and any related funds, as well as additional disclaimers that apply to the MSCI indexes. ## What are the risks and what could I get in return?

### Risks

The risk category above shows how likely the fund is to lose money because of movements in the markets or because we are not able to pay you. The Fund's risk category is not guaranteed and may change in the future.

### Performance scenarios

The figures shown include all the costs of the Fund other than the costs that you may need to pay to your advisor, distributor or other intermediary. The figures do not take into account your personal tax situation, which may also affect your return.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between October 2021 and October 2025.

**Moderate:** this type of scenario occurred for an investment between April 2020 and April 2025.

**Favourable:** this type of scenario occurred for an investment between October 2016 and October 2021.

## What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depository are, in line with applicable regulations, held with a depository in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depository is unable to pay out.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

We have classified this product as 5 out of 7, which is a medium-high risk category.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of State Street Global Advisors Europe Limited to pay you.

**Be aware of currency risk.** You may receive payments in a different currency, so the performance of your investment will be impacted by the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the Fund Prospectus, available free of charge at [www.ssga.com](http://www.ssga.com).

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>35 USD</b>	<b>407 USD</b>
<b>Annual cost impact*</b>	<b>0.4%</b>	<b>0.4% each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 18.5% before costs and 18.1% after costs.
