What is this product?

Type

The Fund is an Irish collective asset-management vehicle ("ICAV"). The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide regular income and capital growth.

Investment Policy:

The Fund tracks as closely as possible the performance of the Bloomberg Euro Treasury 1-3 Year Carbon Tilted Index (the Index), while minimising the tracking error between the Fund's performance and that of the Index, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Index has been designated as the Fund's reference benchmark under Article 8 of SFDR.

The Fund may invest in European government bonds, agency and supranational bonds (developed and emerging markets) which are Index constituents and will not embed a derivative and/or leverage.

The Index consists of fixed-rate, investment-grade sovereign debt from member states of the European Union that participate in the European Monetary Union. The Index only includes securities with maturities between 1-3 years. The Index seeks to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg Euro Aggregate 1-3 Year Treasury Bond Index (the Parent Index). The currency of the Index is EUR and returns are unhedged.

The Index is based on the Bloomberg Index Methodology. The Index applies carbon tilt factors towards countries with lower carbon per capita levels relative to the Parent Index. The carbon tilt factors are used to define the final Index weights, which are then renormalised to sum up to 100%. Please refer the Fund's Supplement for more details on the Index description.

The Fund is passively managed and utilises an investment technique called optimisation, which seeks to minimise the difference in return between the Fund and the Index by taking into account tracking error (the risk that the Fund return varies from the Index return) and trading costs when constructing a portfolio. The Fund will not necessarily invest in every constituent of the Index.

The credit ratings of the Fund's underlying investments may vary from time to time. However, their average credit rating is expected to be at least investment grade.

The Fund may invest in money market instruments and also may invest up to 10% of its assets in other funds, including HSBC funds.

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- ◆ The reference currency of the Fund is EUR. The reference currency of this share class is EUR.

- ◆ Income is reinvested.
- ◆ Authorised Participants only may deal in the Fund's ETF Shares directly with the UCITS.
- ◆ The Fund's ETF Shares are listed on one or more stock exchange(s).
- ◆ You may sell your investment on most working days.
- ◆ The anticipated level of tracking error in normal market conditions is expected to be 0.40%.

Intended Retail Investor

The Fund is designed for investors with a focus on income and who are planning to invest for at least 3 years. The Fund may appeal to investors who are looking for a core fixed income investment and are interested in low-cost exposure to the European government bond market.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

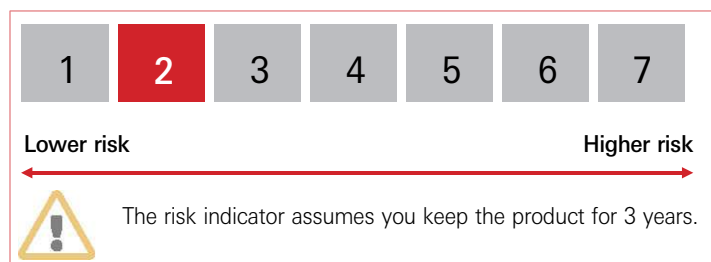

Additional Information:

This document describes a single share class of a sub-fund of the UCITS. Further information about the UCITS including the Prospectus, the most recent annual and semi-annual reports of the UCITS and the latest prices of shares, may be obtained free of charge, in English, from the Administrator by emailing ifsinvestorqueries@hsbc.com, or by visiting www.global.assetmanagement.hsbc.com. The most recent Prospectus is available in English and French. Details of the underlying investments of the fund are available on www.global.assetmanagement.hsbc.com. The indicative intra-day net asset value of the fund is available on at least one major market data vendor terminal such as Bloomberg, as well as on a wide range of websites that display stock market data, including www.reuters.com. The Prospectus, annual and semi-annual reports are prepared for the entire UCITS.

The Depositary is HSBC Continental Europe. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. It is possible to switch your shares into shares of a different share class or sub-fund within the ICAV, however the conversion of the ETF Shares into Non-ETF Shares and vice versa is not permitted. Details of how to do this are in the "How to convert between sub-funds / Classes" section of the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks not included in the Summary Risk Indicator (SRI) include: Liquidity, Counterparty, Operational, Investment Leverage and Exchange Rate Risk. Please refer to the prospectus for other risks.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 Years		If you exit after 1 year	If you exit after 3 years
Investment of EUR 10,000			
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenario	What you might get back after costs	EUR9,040	EUR9,180
	Average return each year	-9.63 %	-2.81 %
Unfavourable Scenario	What you might get back after costs	EUR9,520	EUR9,420
	Average return each year	-4.82 %	-1.96 %
Moderate Scenario	What you might get back after costs	EUR9,990	EUR9,980
	Average return each year	-0.08 %	-0.06 %
Favourable Scenario	What you might get back after costs	EUR10,500	EUR10,520
	Average return each year	4.96 %	1.71 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between February 2020 and February 2023. The moderate scenario occurred for an investment between March 2017 and March 2020. The favourable scenario occurred for an investment between May 2022 and May 2025. A suitable benchmark was used where the Fund had insufficient history.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depositary if the assets of the Fund are lost. The Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations.

In the event of a bankruptcy or insolvency of the Depositary or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ EUR 10,000 is invested.

Recommended Holding Period: 3 Years	If you exit after 1 year	If you exit after 3 years
Investment of EUR 10,000		
Total Costs	14 EUR	42 EUR
Annual cost impact % *	0.1%	0.1% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.08% before costs and -0.06% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
