What is this product?

Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank of Ireland as a UCITS.

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The Fund's investment objective is to generate risk adjusted returns from a combination of income and capital growth over the long term by investing in predominantly Euro-denominated investment grade debt tranches of collateralised loan obligations ("CLOs").

Investment policies The Fund is actively managed. The investment policy of the Fund is to invest up to 100% of its net assets in AAA-rated (as rated by two recognised rating agencies) tranches of Euro-denominated debt issued by CLOs which give access to European senior secured corporate loans and bonds.

A CLO is a diversified portfolio of leveraged loans that is securitised into debt and equity tranches. For the avoidance of doubt, the Fund will only invest in debt tranches.

The Fund will invest in floating rate and fixed rate investment grade debt tranches, predominantly AAA-rated, of CLOs ("CLO Debt Securities"), and the Fund will not invest in the most subordinated securities issued by a CLO. The CLO Debt Securities in which the Fund invests will be of any maturity and tranche size. At least 85% of the CLO Debt Securities will be AAA rated CLO Debt Securities, and up to 15% may be invested in AA rated CLO Debt Securities. In instances where a security is downgraded subsequent to its purchase by the Fund, the Sub-Investment Manager will take steps to divest as soon as reasonably practicable, taking due account of the interests of its Shareholders.

The Fund may invest up to 15% of its net assets in CLO Debt Securities that are denominated in currencies other than Euro.

The Fund may not invest more than 15% of its net assets in CLO Debt Securities issued by CLOs managed by a single CLO manager or its affiliate.

The Sub-Investment Manager will seek to construct a diversified portfolio such that any CLO Debt Securities holding issued from a particular CLO will not exceed 5% of the net assets of the Fund.

Whilst the Fund will seek to use the Index as a performance comparator, the Fund will not seek to track the composition of the Index. Further

details on the investment policy of the Fund can be found within the Fund Supplement.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the EUR Class are issued in Euro.

What are the risks and what could I get in return?

Risks

The risk category above shows how likely the fund is to lose money because of movements in the markets or because we are not able to pay you. The Fund's risk category is not guaranteed and may change in the future.

Performance scenarios

The figures shown include all the costs of the Fund other than the costs that you may need to pay to your advisor, distributor or other intermediary. The figures do not take into account your personal tax situation, which may also affect your return.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between March 2017 and March 2020.

Moderate: this type of scenario occurred for an investment between September 2020 and September 2023.

Favourable: this type of scenario occurred for an investment between September 2022 and September 2025.

What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

We have classified this product as 2 out of 7, which is a low risk category.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of State Street Global Advisors Europe Limited to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the performance of your investment will be impacted by the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the Fund Prospectus, available free of charge at www.ssga.com.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	27 EUR	84 EUR
Annual cost impact*	0.3%	0.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.5% before costs and 1.2% after costs.
