WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS) qualifying as an exchange-traded fund (ETF). It is a sub-fund of BNP PARIBAS Easy ICAV, an open-ended investment vehicle with variable capital organised governed by the laws of Ireland as well as by UCITS Directive 2009/65/CE.

Term

This Product has no maturity date.

BNPP AM France is not entitled to terminate the Product unilaterally. The board of directors of the ICAV has the authority to decide to terminate the Product under specific circumstances as described in the prospectus.

Objectives

Investment Objective: The Sub-Fund (the "Fund") seeks to replicate the performance of the MSCI World ESG Filtered Min TE (NTR) Index (the "Index") while aiming to minimise the tracking error between the Fund's Net Asset Value per Share and the Index.

Investment Policy: The Fund pursues a passively managed (index tracking) strategy.

In order to achieve its investment objective, the Fund will generally seek to replicate the Index by holding all of the Index equity securities in a similar proportion to their weighting in the Index (Full Replication as defined in the Prospectus). The Fund may also employ Optimised Replication (as defined in the Prospectus) and select Index equity securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The Index is a global equity index which measures the performance of large and mid-cap equity securities. The Index selects securities based on Environmental, Social and Corporate Governance (ESG) criteria (such as environmental opportunity, pollution and waste, human capital, corporate governance, etc.) and based on the efforts by issuing companies to reduce their exposure to coal and unconventional fossil fuels. As a result, companies involved in sectors with a potentially high negative ESG impact, those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index.

The type of approach taken by the Index Provider is Best-in-Universe (being a type of ESG selection consisting of giving priority to the best rated companies from a non-financial viewpoint regardless of their sector).

The Index is rebalanced quarterly.

The extra-financial strategy of the Index, carried out at each step of the investment process, may comprise methodological limitations such as the Extra-financial Criteria and Sustainable Investments Risk or the Index rebalancing.

The Fund's base currency is US Dollar.

Further information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the MSCI indices can be found on www.msci.com.

Distribution Policy: It is not the current intention of the Directors to declare dividends in respect of Classes identified as "Capitalisation"

Recommendation: This Fund is suitable for medium to long term investment, though the Sub-Fund may also be suitable for shorter term exposure to the Index.

Please refer to the supplement of the Fund (the "Supplement") for additional details about the objective and investment policy.

Intended retail investors

This Product is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the Product but nevertheless may bear a total capital loss. It is suited for clients who seek growth of capital. Potential investors should have an investment horizon of at least 5 years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the Product for 5 years.

You may not be able to sell your Product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. Because the Product currency is different from the reference currency of the Fund, you will be exposed to the fluctuations between those currencies.

Other risk materially relevant to the Product not included in the summary risk indicator:

- Operational risk: in the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. The markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years Example Investment: EUR 10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

The below scenarios occurred for an investment using a suitable proxy.

The favorable scenario occurred for an investment between 2016 and 2021.

The moderate scenario occurred for an investment between 2013 and 2018.

The unfavourable scenario occurred for an investment between 2021 and 2023.

WHAT HAPPENS IF BNPP AM FRANCE IS UNABLE TO PAY OUT?

The ICAV is incorporated as a separate entity distinct from BNPP AM France. In the event BNPP AM France would default, the assets of the Product/ICAV, held by a depositary, would not be affected by this default.

In case of default of the depositary, the risk of financial loss of the Product/ICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/ICAV.

WHAT ARE THE COSTS?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If this Product is used as an underlying of an insurance policy or a capitalization policy, the costs presented do not include any costs related to such policies.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total Cost	15 EUR	124.46 EUR

	If you exit after 1 year	If you exit after 5 years
Annual Cost Impact (*)	0.15%	0.17%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.76% before costs and 10.59% after costs.
