## What is this product?

**Type:**

This product is a physically backed exchange traded certificate. These are secured, limited recourse certificates.

**Term:**

This product has a final maturity date of 31 December 2100. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the prospectus.

**Objectives:**

The Invesco Physical Palladium ETC aims to provide the performance of the spot palladium price through certificates collateralised with physical palladium.

The base currency is USD.

**Intended Retail Investor:**

This product is intended for investors who are willing to invest for a long term and who plan to stay invested for at least 5 years. Investors should be prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return.

## What are the risks and what could I get in return?

**Risk Indicator**

 The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the ability for you to receive a positive return on your investment.

**Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown here.**

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Base Prospectus available at [etf.invesco.com](https://etf.invesco.com).

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Invesco Physical Markets PLC is unable to pay out?

You may face a financial loss should the Manufacturer or the custodian, JPMorgan Chase Bank, N.A., default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the product performs as shown in the moderate scenario and the investment is USD 10,000.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	19 USD	165 USD
<b>Annual cost impact (*)</b>	0.2%	0.2%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.3% before costs and 13.1% after costs.

## Composition of costs

## How long should I hold it and can I take money out early?

**Recommended holding period: 5 years**

This product has no required minimum holding period however we have selected 5 years as the recommended holding period as the product invests for the long term therefore you should be prepared to stay invested for at least 5 years.

You can sell your shares in the product during this period, subject to satisfying certain criteria as set out in the prospectus, or hold the investment longer. If you sell some or all of your investment before 5 years your investment will be less likely to achieve its objectives, however, you will not incur any additional costs by doing so.
