1. What is this product ?

Product Type : The Fund is a passively managed Undertaking for Collective Investment in Transferable Securities (UCITS) in the form of an Exchange Traded Fund (ETF) under Luxembourg law, constituted as a sub-fund of a Société d'Investissement à Capital Variable (SICAV).

Maturity : This product has no specific maturity date. However, this product may be dissolved or merged, in which case you will be informed by any appropriate means provided for by the regulations.

Objectives : The Fund's objective is to replicate, before the Fund's fees and expenses, the performance of the MSCI World Index closing level. The MSCI World Index (the "Index") is a total return index (net dividends reinvested) expressed in USD, calculated and published by MSCI (the "Index Provider"). For a detailed description of the Index, see section "Description of the Index" of the Prospectus. The anticipated level of tracking error in normal conditions is 0.50% over a one-year period.

Investment Policy : In order to achieve its investment objective, the Fund will primarily use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index or a related index, or a portfolio of its constituents through swap agreements with a swap counterparty. This method implies a counterparty risk as described in the Risk and Reward Profile section of the Prospectus. The net asset value per Share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swaps will be a first-class financial institution that specialises in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described. The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from synthetic replication to physical replication. The Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries. In addition, and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus. The Reference Currency of the Fund is the US Dollar.

Allocation of distributable amounts : Capitalization.

Intended Investors : The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund.

Depositary : State Street Bank International GmbH, Luxembourg Branch.

Additional information : The Fund's prospectus and annual and semi-annual reports are available on the management company's website and free of charge on written request to info@ossiam.com. The net asset value is available on the management company's website. www.ossiam.com

Composition of costs

This table shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

* Secondary Market: because the Fund is an ETF, Investors who are not Authorized Participants will generally only be able to buy or sell shares on the secondary market. Accordingly, investors will pay brokerage fees and/or transaction costs in connection with their dealings on stock exchange(s). These brokerage fees and/or transaction costs are not charged by, or payable to, the Fund nor the Management Company but to the investor's own intermediary. In addition, the investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold.

Primary Market: Authorized Participants dealing directly with the Fund will pay related primary market transaction costs.
